Dave:

The FL contact information has changed. I'm copying George Hayslip and Shaness Thomas so they can send you their current information. They handle our FL Seed Program.

Charlie

Dave,

It was nice meeting you last week. I think it was great to hear and consider the state perspective as we work together to develop improvements to the treated seed tag language.

Thanks for following up with this information. These contacts will be helpful as the initiative progresses. I'm adding Miriam Frugis, who leads the CLA project team for this initiative and Pat McCain, who leads the broader CLA Seed Treatment Working Group.

With kind regards,
Jen Greminger

Jennifer,

The below state seed contacts are being provided by Larry Nees. Larry is the Seed Administrator for the state of Indiana. Larry also serves as the primary point of contact (Secretary) for AASCO <http://www.seedcontrol.org/> . If you have interest in communicating with all state seed control officials or getting on the program at the AASCO annual meeting, Larry would be a good first step in that direction. Larry and I have discussed your groups efforts regarding improving the language and layout of the seed tag as a risk mitigation communication tool.

In addition, if you have specific questions regarding mandatory state seed tag requirements in CA, MI and FL the below contacts might be a place to start.

Please let me know if Larry or I can be of any further assistance in your seed tag efforts. Thanks.
